

# Origami Turtle

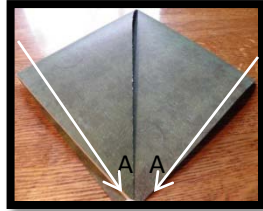

Supplies needed:

**Square paper** (easiest if colored on one side)

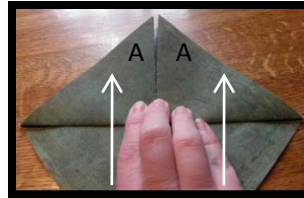

**Scissors**

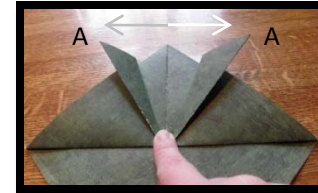

Start with square paper white side up. Fold in half in one direction then open then fold in half in other direction.

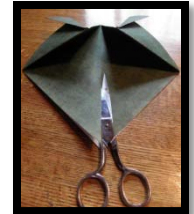

With sheet folded in half fold outside corners in to the center creating a square.

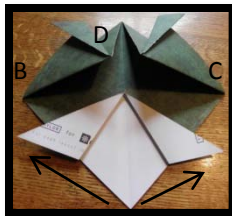

Then fold these same points (A) in half toward the top.

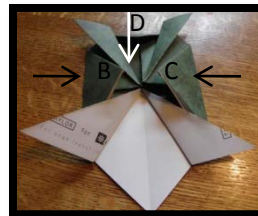

Fold the uppermost points (A) outward to create legs.

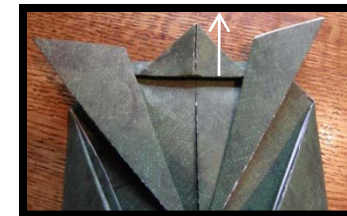

Separate the two paper layers and cut the upper layer to the center.

Fold the flaps that you just cut to create the rear legs.

Fold the two outer points (B+C) to the center and the top point to the center (D).

Now fold the top point (D) in half to create the turtles head. Turn turtle over and enjoy!
